June 30, 1994

#### To All Stakeholders:

I am pleased to submit the thirteenth annual report of the State Investment Board for fiscal year 1993-94.

The year was a challenging one for investment returns, as the bond market, measured by the Lehman Aggregate Index, had a negative return of 1.3 percent, and the broad equity market, measured by the Wilshire 5000 Index was only slightly positive at 1.2 percent. The retirement funds returned 2.2 percent for the period, aided by the returns of international equities, real estate and alternative investments. During the fiscal year, the market value of the retirement portfolio increased by \$600 million to \$19.3 billion.

During the year, the Board completed the restructure of the domestic equity portfolio, initiated in the previous fiscal year, and began a significant expansion of the international equity program. By fiscal year-end, international equities comprised five percent of the retirement portfolio, up from one percent at the end of the prior year.

Near the end of the fiscal year, the Board adopted new asset allocation policy targets for the retirement funds, increasing the allocation to international equities from five to fifteen percent, while reducing the allocation to domestic fixed income from forty-five percent to thirty-five percent. In addition, the allocation to real estate was reduced from six percent to five percent, and the allocation to alternative investments was raised by one percent to ten percent of fund assets.

I would like to take this opportunity to thank the members of the Board for their hard work and dedication throughout the year, and I look forward to continued progress in the year ahead.

JIM CASON, Chairman

#### WASHINGTON STATE INVESTMENT BOARD

#### **INVESTMENT PRINCIPLE**

"The Board shall establish investment policies and procedures designed exclusively to maximize return at a prudent level of risk." (RCW 43.33A.110)

#### **MISSION STATEMENT**

To invest and to manage the entrusted funds in a manner consistent with statutes, regulations, board policies, and the highest standard of professional conduct for the exclusive benefit of fund beneficiaries.

The Washington State Investment Board (WSIB) was created by statute in 1981 to "... exercise all powers and perform all duties prescribed by law with respect to public trust and retirement funds." The law goes on to state "... the State Investment Board shall have full power to invest, reinvest, manage, contract, or sell or exchange investments acquired."

Currently, the Board has investment responsibility for 23 funds which are categorized in three classes: *retirement, insurance,* and *permanent and other* funds. The Board is composed of nine voting members and five non-voting members.

Although governed by an independent board of fiduciaries, the WSIB is part of the executive branch of state government. As a state agency, board members and staff are required to comply with all statutory requirements and rules established for all agencies, officials, and employees in the performance of their public duties.

In order to efficiently analyze investment issues, specific areas of responsibility have been assigned to committees of the Board. The committees consist of selected board members and act as extensions of the Board. Their functions are to analyze investment issues under their jurisdiction in greater detail than would be possible for the full Board. Recommendations are brought to the Board at regular meeting dates for a full Board vote. The Board has currently established four committees which are appointed by the Chair:

**ADMINISTRATIVE** - Responsible for organizational, personnel, budget, and legislative issues, as well as strategic asset allocation matters.

**AUDIT** - Responsible for oversight of accounting and performance reporting, and nominates candidates for the non-voting positions on the Board. In addition, the Audit Committee develops and monitors the Code of Conduct for the Board, and develops corporate governance policies and other non-investment policies for consideration by the Board.

**PRIVATE MARKETS** - Responsible for development of policy and structure of private market investments (real estate, venture capital, leveraged buyouts, etc.). The Private Markets Committee also reviews individual private transactions, partnerships, and investments for recommendation to the Board.

**PUBLIC MARKETS** - Responsible for the development of policy and structure of investments in the public markets; including both debt and equity.

#### STRATEGIC ASSET ALLOCATION POLICY

Approved by the Board on May 20, 1993.

#### PURPOSE:

The following outlines the strategic asset allocation policy and objectives for the Washington State Investment Board (the WSIB) Retirement Funds (Funds) and supersedes any prior board adopted policies.

The asset classes in which investments are made and the mix of assets amongst these asset classes are the greatest source of return and risk to the Funds. Therefore, the selection and management of the asset allocation is the foundation of the investment program and crucial to its success. The Strategic Asset Allocation Policy, when viewed along with the respective investment policies in each asset class, constitutes the Board's view of a prudent and well reasoned approach to the management of the entrusted funds.

#### POLICY:

#### Strategic Objectives & Constraints

The asset allocation is to be managed over time to:

- Maximize return at a prudent level of risk (RCW 43.33A.110 and RCW 43.33A.140). The WSIB considers this within the context of the following:
  - Plan liabilities;
  - Position of asset mix relative to efficient frontier;
  - Long-term nature of liabilities affords the opportunity to be aggressive in seeking return;
  - Position of asset mix relative to other state level retirement funds.
- Provide diversification to the WSIB's overall investment program.
- 3. Exceed the assumed actuarial interest rate.

#### Performance Objective

Exceed the return of a policy benchmark consisting of market indices weighted according to asset allocation targets. Based on the current allocation, the performance objective consists of the following benchmark:

55 percent S&P 500 and 45 percent Lehman Aggregate.

#### Strategic Allocation

- The strategic asset allocation target consists of 55 percent equity and 45 percent fixed income.
- 2. The range around the allocation targets is intended to keep the actual allocation close to the target while minimizing the transactions costs which result from rebalancing. The asset mix may deviate from the target within a range of plus or minus five percent around the target allocation. Any deviation greater than five percent will require rebalancing to the target.

#### STRATEGIC ASSET ALLOCATION POLICY

3. The allocation to specific investments within the target allocation of 55 percent equity and 45 percent fixed income is an investment structure decision and will be the responsibility of the appropriate committee. However, to maintain the expected return and risk posture of the plan within the context of the objectives and constraints delineated above, the following permissible ranges have been established for specific investments. Foreign Equities: maximum of five percent of fund assets. Real Estate: maximum of six percent of fund assets. Alternative Investments (LBO, VC, other private equity): maximum of nine percent of fund assets.

#### **Allocation Management**

- Assets will be allocated to asset classes and investment managers based on target allocations.
- Assets will be rebalanced when market value of assets fall outside allocation range. The timing
  of the re-balancing will be based on market opportunities and the consideration of transaction
  costs, and therefore need not occur immediately.
- 3. <u>Public Securities</u>: Rebalancing will be accomplished first using normal cash flows and second through reallocation of assets within asset class. This reallocation will be based on individual asset class policies or upon recommendations by appropriate Committee.

<u>Appraised Assets</u>: Because of appraisal valuation and illiquid market nature of appraised assets, exceeding the maximum allocation will trigger a conscious review by the *Administrative* Committee and the appropriate asset class committee rather than automatic rebalancing.

#### Review of Strategic Asset Allocation Policy

Markets and Fund condition are dynamic, not static. Therefore, the strategic asset allocation policy should be reviewed by the Committee at least annually and any suggested changes recommended to the Board. A formal asset/liability review should be completed no less than every three years and more frequently if Plan changes dictate.

#### Reporting

The State Investment Board staff will report actual asset allocation to the Board monthly.

#### Responsibilities

- 1. Board The WSIB is responsible for approving SAA policy.
- 2. Administrative Committee Responsible for reviewing and recommending SAA policy to the Board. Responsible for monitoring allocation maintained within target ranges.
- 3. Public/Private Markets Committees The Public/Private Markets Committees are responsible for structural investments within the strategic asset allocation policy (and appropriate asset class policies) and assisting with allocation management as indicated above.
- 4. Staff Responsible for implementing and maintaining policy and reporting to Administrative Committee and Board.

### RETIREMENT FUNDS ASSET ALLOCATION

		====		

In June, 1994, the Board adopted new asset allocation policy targets. Those shown above are the previous targets which were in effect for substantially all of the fiscal year 1994. The new targets increased the allocation to Non - U.S. from 5% to 15%, lowering the allocation to Domestic Fixed Income from 45% to 35%. The allocation to real estate was lowered from 6% to 5%, and the allocation to Alternative investments was raised from 9% to 10%.

### **DOMESTIC EQUITY PROGRAM**

#### **HIGHLIGHTS**

The WSIB Domestic Equity Program is externally managed, employing a combination of passive and active managers. The portfolio has been structured to capture the broad market characteristics as measured by the Wilshire 5000 Index. A major restructuring of this asset class began in the 1992-1993 fiscal year, and was completed this fiscal year.

Since approximately 70 percent of the Wilshire 5000 Index is comprised of S&P 500 stocks, the WSIB portfolio has been structured to include a similar proportion of large capitalization stocks. As the large cap market is generally efficient, the bulk of the large cap portfolio is invested passively in an S&P 500 Index Fund to control costs. Other managers have been hired to "enhance" returns over the S&P 500 Index return, by investing in a very disciplined manner.

The remaining 30 percent of the WSIB portfolio is represented by small/mid cap companies. Since small/mid cap markets are somewhat less efficient, more opportunities exist for adding value through active management. Approximately one half of this portion of the portfolio is invested passively in an Extended Markets Index fund. The remaining half of the small/mid cap portfolio is actively invested by five managers employing a variety of styles and investment philosophies.

#### **CAPITAL MARKETS**

The fiscal year ending June 30, 1994 was a difficult one for the domestic equity markets. The S&P 500 Index returned 1.4 percent for the year, while the broad equity market, represented by the Wilshire 5000 Index returned only 1.2 percent. Stock prices were hurt by rising interest rates, despite a recovering economy and continued growth in corporate earnings.

Both small and large cap stocks performed poorly for the fiscal year. Small cap stocks, represented by the Wilshire 4500 Index, returned 1.3 percent.

#### **PERFORMANCE**

The WSIB domestic equity portfolio returned 1.0 percent for the year, slightly under the 1.2 percent return of the Wilshire 5000 Index.

#### **DOMESTIC FIXED INCOME PROGRAM**

#### **HIGHLIGHTS**

The WSIB Domestic Fixed Income Program is internally managed, employing an active strategy of sector selection to capture excess returns versus the Lehman Aggregate Bond Index. The portfolio has characteristics similar to the index. Although never deviating significantly from that of the Lehman benchmark, duration strategies are utilized in addition to a sector focus. The allocation to Fixed Income was 45 percent of the total portfolio for substantially all of the fiscal year. However, in June 1994, the Board lowered the target allocation to Fixed Income to 35 percent. At fiscal year end, the portfolio was underweighted in Treasuries and overweighted in Corporates, compared to the Lehman Aggregate Index.

#### **CAPITAL MARKETS**

Fixed income assets experienced a difficult period for fiscal year ending June 30, 1994. The 30 year treasury rallied to a low of 5.79 percent on October 15, 1993 and ended the fiscal year at 7.61 percent. Mortgage-backed securities, which suffered severe underperformance due to high prepayment experience in 1992-93, became the best performing asset class for the 1993-94 fiscal year. Treasuries and corporate bonds suffered underperformance due to the large selloff in the bond markets.

#### **PERFORMANCE**

The WSIB retirement fixed income portfolio returned -1.34 percent for the fiscal year, basically matching the Lehman Aggregate Index, which returned -1.31 percent.

#### NON - U.S. EQUITY PROGRAM

#### **HIGHLIGHTS**

In May 1993, the Board adopted a Strategic Asset Allocation Policy which specified a maximum of 5% of the Funds' assets to be invested in non-U.S. equities. The implementation of the 5% allocation to non-U.S. equities was completed in June 1994 and was valued at \$969 million at fiscal year-end.

The Board's non-U.S. Equity Program consists of two components: core and non-core. The core component concentrates on EAFE portfolios (Morgan Stanley Capital Index of Europe, Australia and the Far East). At year end the core component accounted for 77 percent of the total non-U.S. Program. Approximately 70% of the core portfolio is actively invested by regional managers. Half of the active allocation has been made to two European managers (Clay Finlay and UBS), while the other half has been made to three Pacific Basin managers (G.T. Capital, Dunedin, and J.P. Morgan). The remaining 30% of the core portfolio is managed passively by State Street Global Advisors in an international index fund.

The non-core component of the Board's non-U.S. Equity Program focuses on the global portfolio and other future programs. Cursitor-Eaton manages the Board's non-core portfolio, allocating among stocks, bonds and cash in various countries around the world, including the United States.

In June 1994 the Board adopted a more aggressive asset allocation policy that increases international equity exposure to 15%. When fully funded, this increase to 15% will raise the value of the Board's non-U.S. equity program to approximately \$3 billion, calculated on the basis of the value of the Fund on June 30, 1994.

#### CAPITAL MARKETS

International equity markets greatly outperformed domestic equity markets during the 1994 fiscal year. The MSCI EAFE index return of 17.0% was only slightly lower than last year's outstanding performance of 20.3%. The weakness of the Japanese Yen in the second quarter of fiscal 1994 resulted in poor market returns, but both the market and the Yen rebounded during the last 2 quarters. Although the Hong Kong and Malaysian equity markets experienced a severe correction during the third quarter, their overall contribution to MSCI EAFE for the year remained strongly positive. The MSCI Pacific Index finished the fiscal year with a 17.6% return.

European markets suffered during the last two quarters of the fiscal year, but not enough to offset their strong returns during the first two quarters. The MSCI Europe Index finished with a 15.9% return, 1.7 percent below that of the Pacific Basin. For US investors, the weakness of the domestic currency during the last two quarters of fiscal 1994 moderated losses in Europe and amplified gains in the Pacific Rim in U.S. dollar terms.

#### **PERFORMANCE**

The investment objective for the Board's non-U.S. Equity Program is to exceed the total return of the Normal International Equity Benchmark Index (International Index). The International Index is based on the monthly performance statistics of composed of 50% of the percentage return of MSCI EAFE - Europe plus 35% of the percentage return of MSCI - Japan plus 15% of the percentage return of MSCI EAFE - Pacific Basin excluding Japan. WSIB performance exceeded the International Index by 0.4 percent (10.6 percent vs. 10.2 percent).

#### REAL ESTATE PROGRAM

#### **HIGHLIGHTS**

In June, 1994, the Board lowered the allocation target for real estate from 6 percent to 5 percent of retirement fund assets. As of June 30, 1994, real estate equity comprised 3.5% of the fund. During the 1993-94 fiscal year, the Board continued to focus on restructuring the real estate portfolio.

The only significant capital contribution to the real estate portfolio during the 1993-94 fiscal year was an additional \$42 million investment in the Union Square Limited Partnership. Consistent with WSIB Policy, this capital was used to increase cash flow through the retirement of a first mortgage lien.

In July, 1993 the Board initiated a civil lawsuit against The New England Mutual Life Insurance Company and Copley Real Estate Advisors, alleging claims for violations of the Washington State Securities Act, breach of contract and fiduciary duties, and related claims leading to a loss of approximately \$600 million. The Washington State Attorney General and Special Attorney General Foster, Pepper and Shefelman are representing the Board.

#### **CAPITAL MARKETS**

The negative trend of property values in select regions of the United States seems to be reversing. However, the performance of real estate investments appears to have been driven more by the increased availability of capital than by underlying supply/demand fundamentals. While pension funds were the only significant buyer in the market during the 1992-93 fiscal year, pension funds had to compete with REITS, investment companies, individual investors and other securitized vehicles during 1993-94. Interest rates at twenty year lows and strong initial cash yields combined to enhance the appeal of real estate as an asset class.

#### **PERFORMANCE**

The Board's aggressive pursuit of conservative property valuations has largely stabilized property valuations in the portfolio. The one exception was the \$20 million devaluation of the Koll/Washcop portfolio managed by Copley Real Estate Advisors. The time-weighted return in the WSIB real estate portfolio was 7.1 percent for the year -- better than the Russell-NCREIF Property Index and competitive with most other asset classes.

#### **ALTERNATIVE INVESTMENTS PROGRAM**

#### **HIGHLIGHTS**

In June, 1994, the Board increased the target allocation to alternative investments from 9 percent to 10 percent of retirement fund assets. The alternative investment portfolio is invested in funds investing in operating companies and asset-driven situations. The operating company category includes venture capital stage companies and established companies. The established company funds include those that invest in acquisition/buyouts, mezzanine debt, private equity, and distressed and restructuring. Asset-driven situations include natural resources, commodities and financial instruments.

During fiscal year 1992-93, the Board adopted a new Alternative Investment Policy. The goal of the program is to achieve superior total returns compared to those of traditional asset classes, and exceed the returns of large cap public stocks by 300 to 600 basis points in the long run. The program also helps to diversify away capital market risks in the total retirement portfolio. In fiscal year 1993-94, the Board began actively pursuing alternative investment opportunities by committing an additional \$85 million to this asset class. Investments in Kohlberg, Kravis and Roberts (KKR) funds dominate the exposure in the alternative investment asset class for WSIB, accounting for nearly 85% percent of the portfolio.

#### **CAPITAL MARKETS**

During the first three quarters of the fiscal year, a robust IPO (Initial Public Offering) market helped private equity returns. However, economic changes dampened investor IPO appetites in the fourth quarter. Investors continue to commit funds to the private equity market in search of alternatives to the domestic stock and bond markets.

#### **PERFORMANCE**

The WSIB's Alternative Investments portfolio had a time weighted rate of return of 23.8 percent for fiscal year 1994. For the alternative investments asset class, the internal rate of return (IRR) since inception is a standard industry measure of investment performance. The IRR since inception of the total alternative investments portfolio as of June 30, 1994 was 13.8 percent, up from 12.8 as of June 30, 1993. Since inception, the IRR for the \$1.3 billion KKR fund portfolio, which is the largest part of the alternative investments portfolio, was 19.2 percent. In addition to the fund portfolio, KKR manages a \$113 million direct buyout portfolio which earned an internal rate of return of 13.4 percent. The IRR for all remaining alternative investments (\$265 million) was 5.4 percent. During the year, WSIB received \$293 million in distributions from existing investments in this asset class.

#### NOTE:

The accompanying unaudited financial statements and schedules of investments were prepared from the official accounting records of the Washington State Investment Board. Asset listings reflect positions on a settlement date basis, adjusted in aggregate (by fund) for pending trades at year-end. Asset allocation information presented elsewhere in this report is taken from master custodian records and is on a trade date basis. In some cases, reported numbers may differ slightly due to valuation and classification differences.

# WASHINGTON STATE INVESTMENT BOARD RETIREMENT FUNDS NOTES TO FINANCIAL STATEMENTS JUNE 30, 1994

#### 1. Significant Accounting Policies

Retirement fund investments are reported at fair market value, with the exception of short-term investments, which are reported at cost, and commercial real estate mortgages, which are reported at unpaid principal, adjusted for estimated uncollectibles.

Dividend income is recorded on the ex-dividend date. Interest income is accrued when earned.

Monthly, the assets of the retirement Commingled Trust Fund are adjusted to fair market value. Unrealized gains and losses are included as investment earnings on the Statement of Changes in Investment Balance.

#### 2. The Commingled Trust Fund

The Commingled Trust Fund (CTF) is a diversified pool of investments which is used as an investment vehicle for eight separate retirement plans. These plans hold "units" in CTF, which represent an undivided percentage ownership in the pool of investments. Plans are allowed to purchase or sell units in the CTF, based on the market value of the underlying assets, on the first working day of each month.

In addition to unit ownership in the CTF, each retirement plan holds its own short-term investments. These short-term investments are referred to as "plan-specific investments" in the accompanying financial statements.

#### 3. Fees and Expenses

Investment related fees and expenses are paid from non-appropriated funds, and are deducted from investment earnings. The following is a listing of non-appropriated fees and expenses paid during the fiscal year ending June 30, 1994. Management fees for many real estate and venture capital investments are paid from the partnerships and are therefore not reflected here.

Domestic Equity Managers	\$7,467,974
Global and International Managers	1,241,164
Alternative Investment Managers	2,572,698
Legal Fees	798,951
Consultants and Advisors	3,454,588
Custodian	454,765
Equity Commissions Paid	1,906,108
Other Miscellaneous Fees	24,264
TOTAL	\$ <u>17,920,512</u>

# Labor & Industries Funds

- Investment Policy
- Asset Allocation
- Performance
- Fixed Income Program
- Financial Section

Approved by the Board on October 20, 1992.

#### **PURPOSE:**

The following outlines the investment policy and objectives for the Department of Labor and Industries (L&I) Workers' Compensation Funds managed by the Washington State Investment Board (WSIB) and supersedes any prior Board adopted policies. These policies and objectives allow for sufficient flexibility in the management process to capture investment opportunities, yet provide parameters that will insure prudence and care in the execution of the investment program.

#### POLICY:

#### Strategic Objectives

The portfolio is to be managed to achieve the highest return possible consistent with the need to:

- Maintain the solvency of the funds.
- 2. Maintain premium rate stability.
- 3. Ensure sufficient assets are available to fund the ultimate expected liability payments.

Since achieving these objectives is partially dependent on the results of the insurance operations, it is of paramount importance to coordinate the level of risk taken on the investments with the level of risk arising from insurance operations. As a result, the investment approach may need to be modified periodically as a result of exogenous changes occurring on the insurance side. Examples of events arising on the insurance side that could have an impact on investments include a change in the liability discount rate, an adjustment in the level of reserves, or a legislative change, such as an adjustment of benefit levels.

#### Performance Objectives

Performance will be measured by comparing the total return for a period of each major sector to an appropriate market index, as approved by the L&I Fixed Income Committee. The investments are to be actively managed to exceed the returns of these market indices, with a volatility similar to or less than the indices.

#### Investment Approach

The investment approach shall be to identify enhanced return opportunities across market segments and to invest where overall risks are understood and can be managed well within strategic risk and return objectives.

The WSIB will manage four categories of fixed income risk within a domestic context:

- a. Interest rate risk.
- b. Yield curve risk.
- c. Credit risk.
- d. Reinvestment risk.

Interest Rate Risk is price volatility produced by changes in the overall level of interest rates. This risk is to be managed in a controlled manner using historical real return relationships and economic analysis.

Yield Curve Risk is price changes induced by the changing shape of the yield curve. Yield curve risk is to be managed, but in a controlled, disciplined fashion, by employing duration and maturity yield spread analysis.

Credit Risk is the uncertainty surrounding the borrower's ability to repay its obligations. Credit risk is to be actively managed, employing yield spread analysis and credit research.

Reinvestment Risk is to the uncertain future yield opportunities available to invest funds which become available due to call, maturity or coupon generated cash flow. Reinvestment risk is to be managed through call and prepayment risk analysis, and diversification of maturities.

The WSIB will manage within the constraints of two categories of equity risk:

- a. Market risk
- b. Firm-specific risk

Market Risk, or systematic risk, is the price volatility associated with changes in the overall equity market, and as such cannot be directly controlled by the manager. The general approach used by WSIB is to determine a desired level of equity exposure within the guideline range, and then to gradually shift the degree of equity investment to that level. A long term time horizon is used; attempts to time short run market movements are not considered appropriate.

Firm-Specific Risk, or nonsystematic risk, is the price volatility associated with the varying unique characteristics of individual securities. This risk is to be managed by maintaining a well-diversified equity portfolio.

#### **Investment Process**

#### A. Portfolio Constraints

- 1. All assets under management by the WSIB are to be invested to maximize return at a prudent level of risk in accordance with the requirements of statutes RCW 43.33A.110 and RCW 43.33A.140, which state in part that the WSIB is to "...establish investment policies and procedures designed to attempt to limit fluctuations in industrial insurance premiums, and, subject to this purpose, to maximize return at a prudent level of risk."
- 2. No corporate fixed income issue shall exceed 3 percent of cost or 6 percent of market value of the Funds at the time of purchase (RCW 43.84.150).
- 3. No more than 15 percent of the lesser of the market value or the amortized cost of the fixed income portion of the portfolios shall be invested in securities rated less than single A. This recognizes the need of any insurance entity to maintain an overall high quality portfolio, while providing the portfolio manager sufficient flexibility to seek increased returns.
- 4. The maximum investment in equities measured at market value will be 125 percent of the Funds' consolidated contingency reserve. This constraint should be viewed from a long term perspective: short term fluctuations in the contingency reserve or the equity markets might cause equity investments to temporarily exceed this level.

#### B. General Strategies

#### Fixed Income

- 1. The fixed income assets are to be managed to add value principally through credit valuation, sector selection, and interest rate level analysis.
- Internal management is to be used unless special expertise is required or a special opportunity exists which can only be accessed by contracting with external managers.
- 3. A two-tier macro/micro management approach is to be used to implement the portfolio strategies. The "macro" component is to include strategic and some tactical decision processes, such as the allocation among different fixed income segments and the decision to set the appropriate asset dollar duration target, based on the analysis of the liability durations. The "micro" component will address individual security selection within each fixed income segment utilizing credit, duration, and valuation analysis.
- 4. Value at the macro level is to be added through the allocation of cash flow and the redeployment of existing assets to fixed income segments which offer a high current yield to maturity spreads relative to their historical norms and/or to other alternative investment choices. Within policy ranges, duration should be managed with cash flows and re-deployment of existing assets by concentrating purchases and re-deploying existing assets along those sections of the yield curve where the yield premium is high relative to historical norms.
- 5. Within fixed income segments, value is to be added to purchasing bonds where the yield spread over the U.S. Treasury yield curve is such that risks of not realizing the promised yield spread, either from credit or call risk, do not materially reduce the expected yield benefit.
- Only when value cannot be found should U.S. Treasury issues be purchased. Under most
  market circumstances the fixed income segment will have a Treasury allocation well below its
  public market representation.

#### **Equities**

- The equity assets are to be managed to add value principally through increased exposure to the overall equity market.
- 2. Asset exposure to the equity markets will be measured by comparing the total market value of equity investments to the Funds' consolidated contingency reserve. The maximum equity allocation over the long term is 125 percent of the contingency reserve. A change in either the level of the contingency reserve, or the trend in the level of consolidated net income may result in a revision in the level of equity holdings.

#### C. Specific Strategies

- 1. Fixed income assets are to be allocated across the various fixed income sectors based upon:
  - a. The strategic (long-term) allocation to each fixed segment (as shown in Exhibit 1 of this policy).

- b. The permissible range around each strategic allocation target.
- c. The available yield spreads relative to Treasuries versus historical norms, after analysis for validity. When a fixed income segment exhibits a yield spread versus Treasuries greater than the historical norms, new cash flow and/or the re-deployment of existing assets may be made to that segment.
  - 1) Yield spreads shall be analyzed on a fully option-adjusted basis.
  - Yield spreads shall be analyzed on a fully risk-adjusted basis.
- d. The available yields of other fixed income alternatives.
- 2. Equity investments are currently allocated entirely to an S&P 500 Index Fund. A strategy involving other broad market indexes, such as the Wilshire 5000, may also be used. This approach may be modified on the decision of the L&I Fixed Income Committee.
- 3. Permissible Investments:
  - a. U.S. Treasuries and Government Agencies excluding mortgages and mortgage backed securities (MBS), including derivative securities whose deliverable instrument is a U.S. Treasury or government obligation.
  - b. Investment Grade Corporate Bonds rated BBB- or higher by Standard and Poor's and Baa3 or higher by Moody's Investors' Service at the time of purchase.
  - c. Publicly traded Mortgage Backed Securities, including derivative securities whose deliverable instrument is a U.S. mortgage backed security.
  - d. Privately Placed Mortgages, including single family residences, commercial whole loans, and privately placed mortgage backed securities.
  - e. Private Placements of corporate debt.
  - f. Asset Backed Securities rated BBB- or higher by Standard and Poor's and Baa3 or higher by Moody's Investors' Service.
  - g. Non-U.S. Dollar Bonds.
  - h. U.S. Equities.
  - i. Non-U.S. Dollar Equities.
  - Derivative products such as futures and options, used as hedging instruments.

Other instruments may be added from time to time as they are developed or deemed appropriate.

#### Reporting

- A. A management information system is to be used for reporting internally to senior staff on the implementation of this policy. Monthly reports should include, but are not limited to:
  - 1. Current market values, amortized book values, and unrealized gains or losses.
  - 2. Monthly and year-to-date realized gains and losses by sector. This information is to be provided to WSIB by L&I.
  - 3. Aggregate and individual portfolio characteristics compared to guidelines.
  - 4. An exception report, covering delinquencies, defaults, and deteriorating credits.
- B. Quarterly executive management reports are to be provided to the L&I Fixed Income Committee consisting of all of the above items, as well as showing the status of policy compliance and identifying exceptions with explanations.

#### Responsibilities

- A. Board the WSIB is responsible for approving the strategic policy.
- B. L&I Fixed Income Committee responsible for reviewing and recommending strategic policy to the Board. Responsible for reviewing WSIB staff investment management guidelines.
- C. WSIB staff responsible for implementing policy and reporting to the L&I Fixed Income Committee and the Board.

- Schedule of Investments

### **NOTE:**

The accompanying unaudited financial statements and schedules of investments were prepared from the official accounting records of the Washington State Investment Board. Asset listings reflect positions on a settlement date basis, adjusted in aggregate (by fund) for pending trades at year-end. Fixed income investments are reported at amortized cost in the financial statements, while equity investments are reported at market.

Asset allocation information presented elsewhere in this report is taken from master custodian reports and is on a trade date basis. All asset allocation numbers reflect market value of investments.
